

Milano

Jacopo Foggini

General description:

The high-backed Milano chair, with its slender shape, ribbed texture and colours tending to warm grey, takes inspiration from the facade of the Milan Duomo.

Created with artisan craftsmanship in polychrome polycarbonate, the chair's linear geometries are made more precious by fluid variations in the material's tones, and its unique "reed" structure.

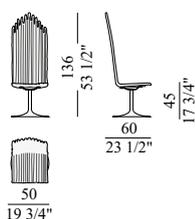

The colours range from white to grey, playing with polycarbonate's ability to reflect light and colour.

Technical description:

Monocoque seat and backrest, realized in polychrome polycarbonate
Basement in shiny metal. Swivel seat.
