

BAMBOO

Bamboo

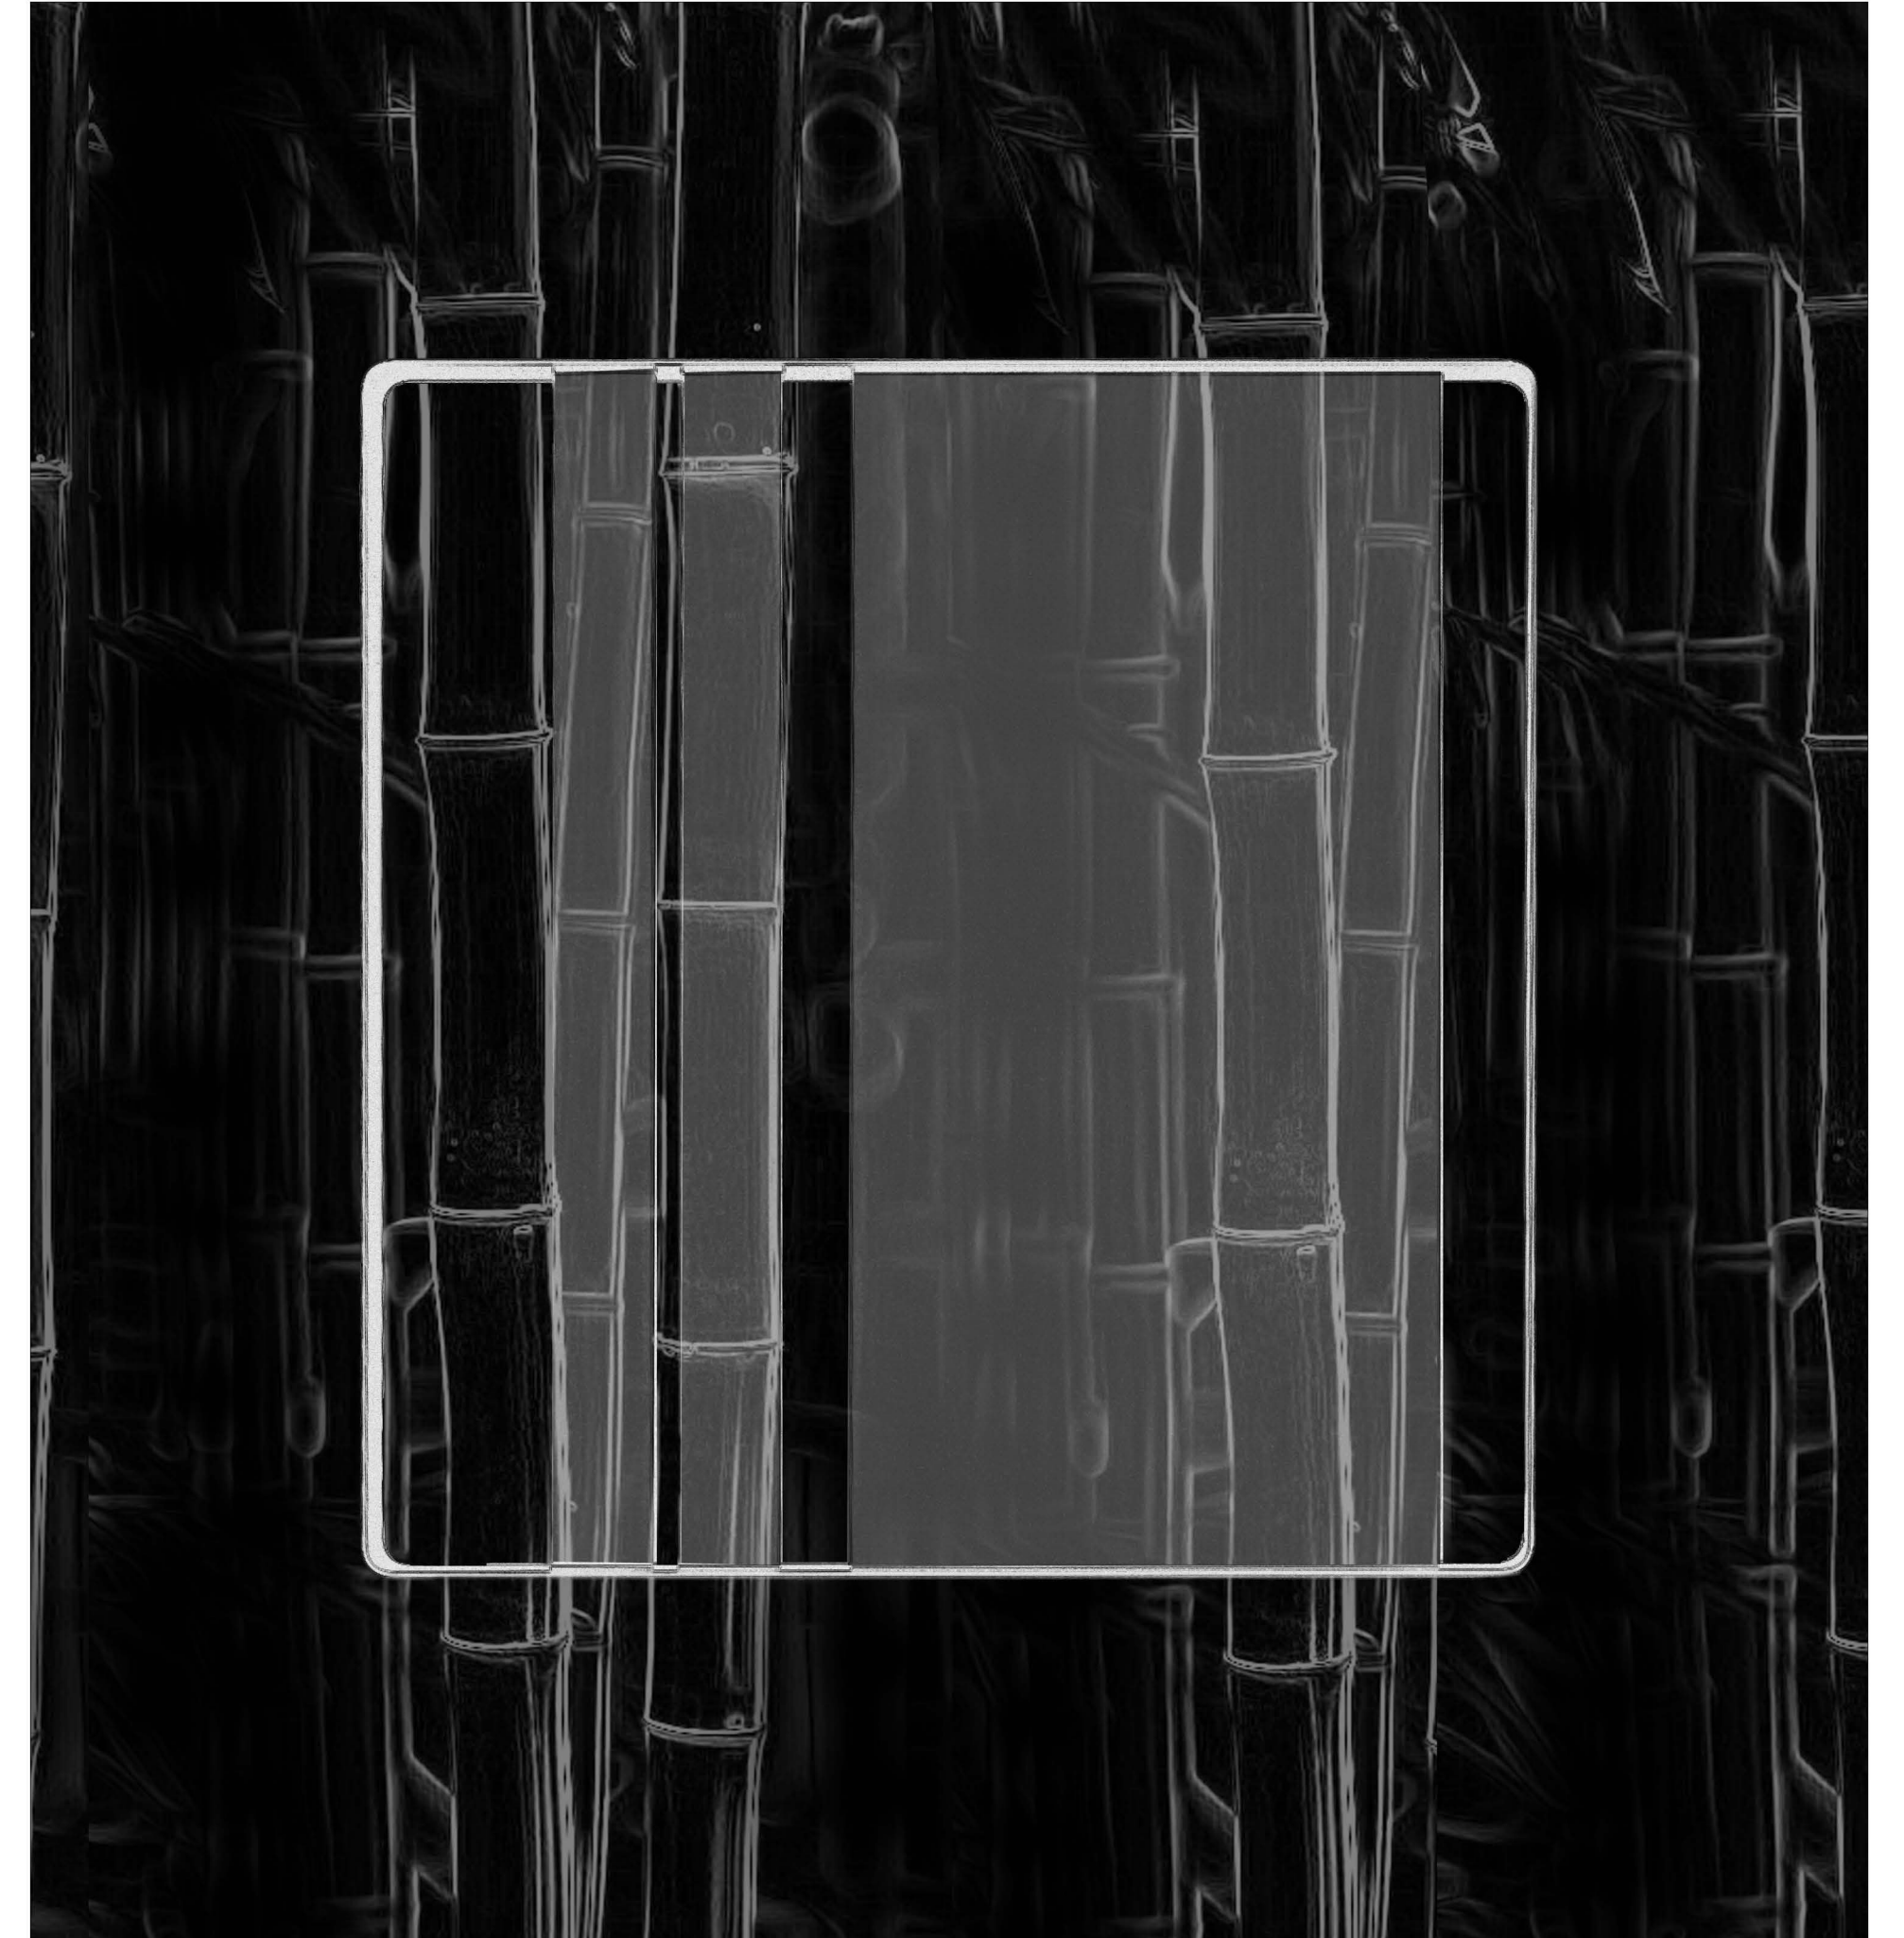

Collection expansion
for greater compositional freedom

« Like a bamboo forest, these mirrors develop by playing with light and letting it filter gently, just like the sun through the branches. Bamboo is born from the balance between matter and light, between essentiality and poetry to transform space with elegance and dynamism.»

Ilenia Viscardi

KEY FEATURES

- Balance between reflective function and light
- Slim, elegant metal frame
- New dimensions

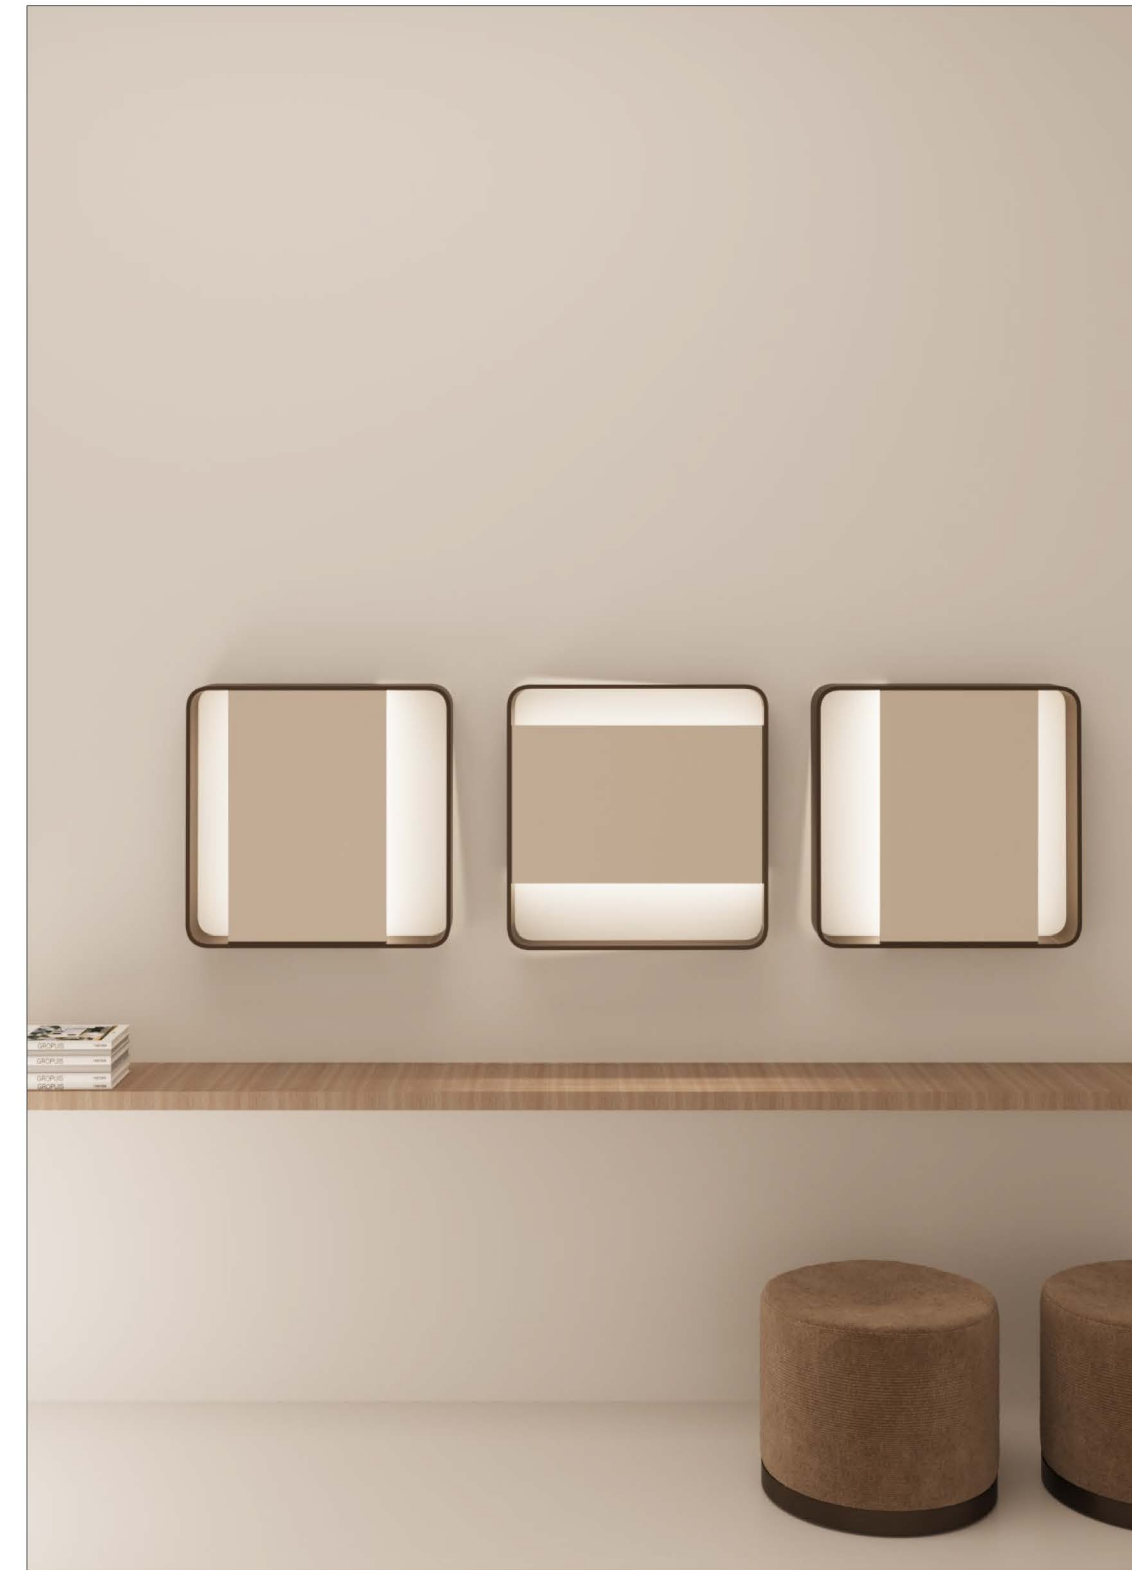

BAMBOO

The expansion of the Bamboo collection enriches the range, while maintaining its design identity intact. Designed to interact with the space in a discreet but meaningful way, Bamboo mirrors combine a reflective function with soft, atmospheric lighting, enriching the environment without ever overpowering it. The line is clean and essential, designed not to overlap or compete with other furnishing elements.

The reflective surface is deliberately limited: the mirror does not reflect a frontal, dominant image, but rather a partial, fleeting reflection, like a glance through a sequence of bamboo canes. It is LED backlit and hinged to a thin, elegant metal frame, available in anodic bronze, matt burnished, matt white, matt black and matt greige finishes; a range of finishes that makes Bamboo suitable for both contemporary and more classic spaces.

BAMBOO

Each mirror is equipped with integrated rear lighting, which generates a soft, diffused light with an intensity that gradually fades, creating a warm and enveloping atmosphere.

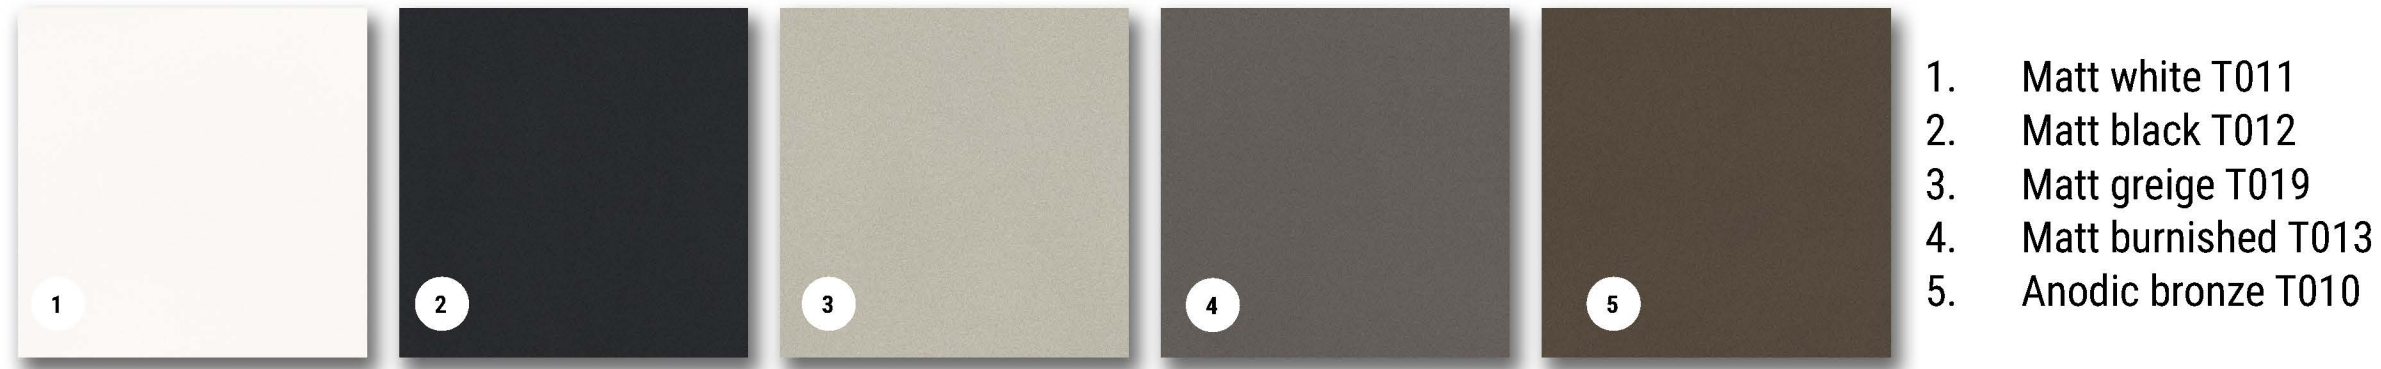

The lights are switched on and off using a small magnetic remote control, which can be conveniently attached to the Structure, always within easy reach.

The new sizes - 170x192 cm floor-standing and 60x60 cm and 80x80 cm square wall-mounted - expand the design potential of the mirrors, both as individual elements and when combined in original compositions.

Bamboo thus confirms its essential and sophisticated identity: an object that interprets the theme of the mirror in a contemporary key, through a measured balance between function, light and formal presence.

FEATURES

STRUCTURE

TECHNICAL DATA SHEET

MATERIALS

Structure: Iron coated with epoxy powder

Mirror: Extra-clear mirror

Lighting: 2 LED kits for sizes 60x60 and 80x80
4 LED kits for size 170x192

MAINTENANCE

Epoxy finishes: For routine maintenance, use a soft or microfibre cloth and neutral products that do not contain thinners, corrosive or abrasive substances.

In case of accidental contact with acids and solvents or staining substances such as oils, alcohols, perfumes, carbonated drinks, coffee, citrus fruits, immediately remove the liquid from the surface.

Mirrors and glass: Use commercially available glass cleaning products.
